Education & Awards

University of Michigan - Ann Arbor

May 2025

Bachelor of Engineering - Computer Science and Engineering

Ann Arbor, Michigan

Dean's List - Honors Recognition

Michigander Scholars in Semiconductors Scholarship - KLA

Jan. 2025

Awarded \$5,000 for academic excellence to Michigan's semiconductor industry

Ann Arbor, Michigan

Courses: Operating Systems, Web Systems, Computer Security, User Interface Development, Computer Architecture, Info Retrieval, Human-Centered Software, Data Driven Software, Linear Algebra, Calc I-III

Experience

Sarf

Aug. - Dec. 2025

Software Engineer — Next.js, React, iOS, Android, Supabase

New York City, New York

- **Raised up to \$200,000 by developing the marketing site and demoing the platform to partners**, leading to 50+ early sign-ups, 5 investor pitches, and moved product toward patent-pending status.
- **Developed an interest-free AI finance platform** by using Next.js, React, Expo, and Supabase — implementing user accounts, authentication, AI itinerary generation prototyping, payment flow, ledger system, and integrating live market-data APIs for real-time financial context.

KLA

May - Aug. 2024

Software Engineering Intern — Semiconductors, Java, gRPC, GitHub, Postman

Ann Arbor, Michigan

- Developed a scalable internal app across 2+ divisions by integrating remote machine controllers using a microservice/plugin based API architecture for global labs, **reducing internal tool interaction time by 30%**
- Designed **8+ automation API endpoints** for remote access to internal tools via global deployment across offices, standardizing interactions across California and Michigan offices

University of Michigan - Ann Arbor

Nov 2023 - May 2024

Web Intern — WordPress, HTML/CSS5, AwesomeTables, WPBakery

University of Michigan

- Designed MIDAS websites to improve **university-wide marketing of 5+ AI events**, incorporating real-time feedback to increase web traffic during the F23/W24 semesters across WordPress and the University of Michigan database

Vitra.AI

May 2025 - Present

Co-founder — Gemini, Python, Flask, React

University of Michigan

- Co-founded Vitra, a non-profit **AI transliteration app** to reduce diagnosis time and increase accuracy of patients different language barriers via **40+ languages** for real-time communication
- Scaled ideation to an MVP with **demos of 2 clinics** by assembling and managing a team of undergraduate engineers using agile workflows, Gantt charts, and phased prototyping to demo

Projects and Entrepreneurship

Takhat Cafe | Co-Founder | Project Management, Leadership

Mar. 2025 - Present

- **Led marketing team** by advertising on social media, community events, and designing flyers to reach 5k unique accounts in 3 months, **resulting in 1000+ sales**.
- Collaborated with 10 organizations across Michigan to partner events, reaching over 800 customers satisfied
- **Secured 10+ clients by pitching services** and adjusting based on clientele feedback, resulting in **1.2k units sold in 6+ cities**

Multi-Threaded Network File Server | Networking, File Systems, C++, Threads

Apr. 2025

- Built a **scalable thread-per-request file server** supporting 4 network commands and 95% protocol data validation compliance with client requests by introducing per-file locking and hand-over-hand traversal for safe parallel access to shared file system state
- Handled **1,000+ concurrent client requests test programs** avoiding race conditions or memory leaks and verified via **stress tests and edge-case validations** for malformed inputs and I/O failures

Multicycle CPU Simulator | C, Assembly, LC2k, ARM

Apr. 2024

- Developed a multicycle CPU and unified L2 cache simulator in C for the LC2K architecture, implementing configurable block size, set associativity, and LRU replacement; supported write-back and write-allocate policies, achieving optimizations across 20+ assembly test programs with detailed memory transfer tracking, and hazard optimizations

Technical Skills and Interests

Languages: Python, Java, C++, C, JavaScript, Swift, Flutter, HTML/CSS5

Frameworks: React, TypeScript, Tailwind, gRPC, Next.js, Flask, SQL, Excel, WordPress

Interests: Volleyball, Hiking, Gardening, Pokemon Go, Raspberry Pi-5, Networking, Cafe Business
